Version 21.5-01 - 21.5-05

- **Implemented additional financial indicator for STARS-HQ sites to allow automatic setting of FY in standard layout**

- **Removed scheduled night differential hours from civilians when changing from graded to ungraded**

- **Modified batch extension to generate night differential on holidays with scheduled hours**

Version 21.5-01 - 21.5-05

- **Modified the Alternate Supervisor Assignment window in the Web application to only display the SSNs of the employees to whom the user has access**

- **Modified the batch extension process to treat hours charged to type hour code 'CE' the same as it does other overtime type hour codes**

- **Modified year end Oracle batch 'MS228DO2' program to delete DCPS estimated hours before passing to DIFMS**

- **Accommodate multiple UICs within one instance.**

- **Revise the Web application to improve performance.**

- **Implement all remaining reports in the web application.**

- **Implement the Group Certify functionality in the web application.**

22.0-00 SIRs

- **Add the capability to edit JONs based on an expiration date. If the JON has expired, do not allow it to be used.**

- **Allow multi-select when selecting data on the search windows (e.g., multiple shops, supervisor assignments, etc).**

- **Modify the Leave JON window to allow additional type hour codes so that JONs used for regular, overtime, comp time, etc. hours will appear in the JON drop down on the T&A window.**

22.0-00 SIRs

- **Add on-line functionality to allow users to limit JONs to specified shops. Currently, this can be done only by supplying a data file and running a batch process.**

- **Users with the SA menu code should have access to SLDCADA even when regular users are locked out just like users with the OP menu code.**

- **Do not display or automatically select expired predetermined JONs in the JON drop-down on the T&A window.**

- **Include supervisor name in all supervisor-assignment drop-downs (e.g., on the employee window).**

- **Add functionality that would allow users to go directly to their own T&A records for the current pay period without having to perform a search.**

- **On the T&A and Certification windows, show the actual date under the day abbreviations (MM/DD).**

- **Allow all searches, screens, and reports to be generated for military, civilian, or non-employee separately or combined.**

- **Optionally, do not allow changes to T&L Category on the Employee Field window.**

- **Add a new 'JON required' option to the Activity Profile window. This will allow a site to require "JON Edits" (via the existing option) if a JON is entered in T&A while also allowing the JON to be omitted when desired.**

- **Display calculated time present on the clocks tab.**

- **Increase the size of Sub Job Order Number field from 9 positions to 10 positions.**

- **Allow sites to grant access to the Employee BIMER 1 and BIMER 2 tabs separately.**

- **Add a column to the clocks tab of the Time and Attendance window that will allow the user to pick from a list of values (e.g., TDY, business meeting, offsite training, etc.) for each day of the week. This would be used to allow users to account for days that they are not in their normal workplace but are still on official business.**

- **Add a description to the Subshop field and make that description available in drop-downs**.

SLDCADA

- **Add the capability to restrict updates on the Employee Field window to only the work schedule field.**

- **On the Employee windows, move the Environmental Hazard field from the Civilian tab to the Civilian Predetermined tab.**

- **Add Shop and Subshop to the Predetermined tab on the Employee window to allow generation of labor records using shops and subshops other than those assigned to the employee.**

- **Combine the JON, Local JON, and PDF tables and windows into one table and window.**

- **Allow userID to be 64 characters.**

Additional Functionality/Features of Note:

- **On-line extension of Time and Attendance**

- **New Reports:**
  - ✔ Prior Pay Certification
  - ✔ Master Employee List
  - ✔ Timecard Input

- **Timesheet includes 4 additional fields for recording In/Out times**

- **Mandatory fields are highlighted**

SLDCADA

Additional Functionality/Features of Note:

- **Ability to view, modify, and delete future employee updates**

- **Future updates are audited when applied**

- **Ability to separately control access to the Predetermined tab from other Employee window tabs**

- **Ability to create prior pay clock changes**

- **Ability to enter military and non-employee prior pay corrections**
